O'REILLY®

Learning Perl 6

KEEPING THE EASY, HARD, AND IMPOSSIBLE WITHIN REACH

brian d foy

Table of Contents

Preface xiii

1. Introduction 1
Why Perl 6? 1
First Steps with the REPL 2
Reading the Documentation 4
Basic Syntax 4
Terms 5
Operators and Expressions 5
Statements 8
Blocks 8
Comments 9
Unspace 10
Objects and Classes 10
Variables 11
Simple Output 13
Lexical Scope 13
Predefined Variables 14
Making and Running a Program 15
Summary 16

2. Number Guessing 17
Binding and Assignment 17
A MAIN Program 18
Program Arguments 19
Prompting for Values 21
Literal Numbers 22
Formatting Numbers 23

Numeric Operations 24
Conditional Execution 27
Boolean Values 27
Comparing Things 30
Conditional Branching 33
Putting It All Together 35
Summary 37

3. Numbers. 39
Number Types 39
Integers 40
Type Constraints 40
Smart Matching 42
Rational Numbers 44
Imaginary and Complex Numbers 46
Numbers Small and Large 48
The Numeric Hierarchy 49
Summary 50

4. Strings. 51
Literal Quoting 51
Escaped Strings 52
Adverbs for Quoting 53
String Operators and Methods 54
Looking Inside Strings 56
Normal Form Grapheme 57
String Comparisons 58
Prompting for Input 59
Number to String Conversions 61
String to Number Conversions 61
Interpolated Strings 63
Here Docs 66
Shell Strings 67
Shell Safety 68
Fancier Quoting 69
Summary 70

5. Building Blocks. 71
Blocks 71
Lexical Scope 72
Control Structures 73
Phasers 75

Storing Blocks 78
Blocks with Parameters 79
Simple Subroutines 82
Named Subroutines 83
Whatever Code 84
Subsets 85
Summary 86

6. Positionals 87
Constructing a List 87
Iterating All the Elements 90
Ranges 94
The @ Coercer 95
Sequences 96
Infinite Lazy Lists 98
Gathering Values 100
Single-Element Access 101
Changing a Single Element 103
Multiple-Element Access 104
Arrays 104
Constructing an Array 105
Interpolating Arrays 106
Array Operations 107
Lists of Lists 108
Flattening Lists 109
Interesting Sublists 110
Combining Lists 111
The Zip Operator, Z 111
The Cross Operator, X 112
The Hyperoperators 113
The Reduction Operator 114
Filtering Lists 115
Transforming a List 116
Sorting Lists 117
Sorting on Multiple Comparisons 119
Summary 120

7. When Things Go Wrong 121
Exceptions 121
Catching Exceptions 122
Backtraces 124
Rethrowing Errors 127

Throwing Your Own Exceptions 128
Defining Your Own Exception Types 129
Failures 129
Warnings 130
The Wisdom of Exceptions 131
Summary 132

8. Files and Directories, Input and Output. 133
File Paths 133
File Test Operators 135
File Metadata 137
Linking and Unlinking Files 138
Renaming and Copying Files 140
Manipulating Directories 141
Directory Listings 142
Creating Directories 143
Removing Directories 143
Formatted Output 144
Common Formatting Tasks 146
The Standard Filehandles 147
Standard Output 147
Standard Error 148
Standard Input 149
Reading Input 149
Reading Lines 150
Reading a File 151
Writing Output 152
Opening a File for Writing 152
Binary Files 153
Moving Around 154
Writing Binary Files 154
Summary 155

9. Associatives. 157
Pairs 157
Adverbs 158
Modifying a Pair 159
Maps 160
Checking Keys 161
Creating from a Positional 161
Checking Allowed Values 162
Hashes 163

Accumulating with a Hash 165
Multilevel Hashes 167
Summary 168

10. Using Modules. 169
Installing Modules 169
Loading Modules 170
Finding the Module 171
Lexical Effect 173
Loading a Module at Runtime 174
Fetching Data from the Web 177
Running Perl 5 in Perl 6 177
Summary 178

11. Subroutines. 179
A Basic Subroutine 179
Extra Arguments 180
Explicit Returns 180
Recursing 182
Iterating Instead of Recursing 182
Storing Subroutines in Libraries 183
Exporting Subroutines 184
Positional Parameters 185
Slurpy Parameters 186
Have It Both Ways 187
Combining Slurpies 188
Optional and Default Arguments 189
Parameter Traits 189
Parameter Constraints 190
Same Name, Different Signature 191
Literal Value Parameters 191
Number of Arguments 193
Parameter Types 193
Named Parameters 195
Required Named Parameters 196
Named Parameters for Free 196
Mixed Parameters 197
Return Types 197
Summary 199

12. Classes. 201
Your First Class 201

Defining Methods 202
Private Methods 203
Defining Subroutines 204
Objects 204
Private Attributes 205
Public Attributes 207
multi Methods 208
Inheriting Types 209
Checking Inheritance 211
Stub Methods 212
Controlling Object Creation 213
Building Objects 214
Tweaking Objects 217
Private Classes 217
Summary 218

13. Roles. 219
Adding Behavior to Classes 219
Applying Multiple Roles 220
Methods in Roles 221
De-Conflicting Roles 222
Anonymous Roles 225
Summary 227

14. Junctions and Sets. 229
Junctions 229
any 229
all 233
one 233
none 234
Some Junctive Tricks 234
Sets 235
Set Operations 238
Summary 239

15. Regular Expressions. 241
The Match Operator 241
Match Operator Syntax 242
Successful Matches 243
Defining a Pattern 244
Predefined Patterns 245
Matching Nonliteral Characters 246

Matching Any Character 247
Matching Types of Characters 249
User-Defined Character Classes 251
Matching Adverbs 253
Matching Either Case 253
Ignoring Marks 255
Global Matches 255
Things That Use Patterns 256
Substitutions 256
Summary 257

16. Fancier Regular Expressions. 259
Quantifiers 259
Zero or More 260
Greediness 261
Zero or One 261
Minimal and Maximal 262
Controlling Quantifiers 263
Turning Off Backtracking 263
Captures 264
Named Captures 265
A Capture Tree 267
Backreferences 268
Surrounders and Separators 269
Assertions 270
Anchors 271
Conditions 272
Code Assertions 273
Alternations 275
First Match 275
Longest Token Matching 277
Summary 279

17. Grammars. 281
A Simple Grammar 281
Multiple Rules 284
Debugging Grammars 286
Grammar::Tracer 286
Grammar::Debugger 287
A Simple Action Class 287
Creating an Abstract Syntax Tree 288
Ratcheting 290

Parsing JSON 291
Parsing CSV 294
Adjusting the Grammar 296
Using Roles in Grammars 297
Summary 298

18. Supplies, Channels, and Promises. 299
Supplies 299
Multiple Taps 301
Live Supplies 302
Channels 303
Promises 305
Waiting for Promises 306
Waiting for Multiple Promises 307
Managing Your Own Promises 308
Promise Junctions 310
Reactive Programming 311
Reacting in the Background 314
Summary 315

19. Controlling Other Programs. 317
Quick and Easy 317
Quoted Commands 318
Safer Commands 319
Writing to a Proc 320
Procs 321
Asynchronous Control 322
Summary 323

20. Advanced Topics. 325
One-Liners 325
Declarator Block Comments 325
Feed Operators 326
Destructuring Signatures 327
Defining Your Own Operators 327
Perl 5 Patterns 328
Shaped Arrays 328
Typed Containers 328
NativeCall 329
The with Topicalizer 329

21. Conclusion. 331

Glossary 333

A. Exercise Answers 345
